

Massimo Vignone

Systems and Network Administrator, VoIP Specialist at Università di Modena e Reggio Emilia

vignone@unimo.it

Summary

System and network administrator, with good experience in administering and troubleshooting heterogeneous networks.

In the past he worked as a software developer and was a contributor of an Italian IT magazine.

He had some experience as digital forensic consultant.

Actually he's spending most of his time trying to setup complex SIP-based VoIP networks and keeping them working.

He' s also responsible for the proper functioning of the data center for the organization he works for and is overseeing the project for a new TIA/EIA 942 compliant data center.

One of his goal is to achieve a deeper knowledge in security and digital forensic.
